

WILITEC
Engineering & Services

ALWAYS AT YOUR SERVICE

WILITEC
Engineering & Services

OUR MISSION

WILITEC's mission is to understand the need of market and deliver smart solutions and products. We consider ourselves successful when we deliver final products to our client in a timely manner and if our products meet with our clients objectives.

- We are committed to listening to our consumers who is at the center of all our efforts and decisions → Customer Focus
- We develop innovative products based on consumer insight → Continuous Innovation & Improvement
- We provide high quality, competitively priced, short lead-time, and reliably delivered products through an exceptional workforce → Competitive Pricing & Industry Leading Quality

“At Wilitec, the client is at the center of our attention everyday from the design to the delivery to build long lasting relationships”

OUR VISION

- To be recognized as a world-class provider of technical services and manufactured products in the Well Intervention market
- Our customer's preferred supplier
- An innovative company
- An extraordinary place to work

OUR VALUES

To succeed in our mission, we have our core values, which guide us in our day-to-day operations. They are:

- People & Teamwork
- Passion & Perseverance
- Respect, Trust & Integrity

Executive Management

Bruno Le Briere had over 23 years experience in the oil and gas industry. He has held numerous senior Technical and Operational positions including Asia Area Manager for Slickline Operation at Schlumberger. He holds an Mechanical Engineering degree from Ecole Central d'Arts et Metiers Paris. Bruno had significant impact on the slickline business through major technological innovations, breakthrough and patents. Bruno decided to start WILITEC, a new startup Engineering and Manufacturing Equipments and Services for Well Intervention business (Oil & Gas Activity) to create alternatives solutions to Clients and to bring value with technological innovations and customized solutions.

The engineering section employs Indonesians and expatriates engineers, working in three different sections, R&D, Industrialization and Support and with competency in various domains such as mechanical, hydraulic and electro-hydraulic. The engineering department can manage a project from the conceptual design stage to engineering, drafting, prototype manufacturing, field testing and industrialization.

The engineers use the most up to date engineering and analysis software. Projects include mechanical, hydraulic, electro-hydraulic and data acquisition systems with all relevants regulation such as ATEX or EN. The department of engineering is a technically advanced, customer service oriented organization that pursues the goal of collective excellence through personal and collaborative efforts.

Your team knows what they need, we know how to help them get that product. Let us assist you in developing the best products which fits to your needs with the quality, reliability and resources to deliver a cost effectiveness product. Together we create new innovative products.

CERTIFICATION

Highlighting the importance that safety and quality have within the oil & gas industry, WILITEC is fully committed to follow and implement standards and rules for liftings Offshore Frame and for Hazardous Area.

The manufacturing department is made up three different sections; Fabrication, which includes certified welders, Production for machining and Mechanical Hydraulic for unit assembly. Fabrication and Production are done in partnership with highly qualified subcontracting companies in Indonesia, Singapore and Malaysia. These partners employ qualified and competent professional, cultivates an innovative, safe and healthy work environments and strives to continuously improving. Supervision and Integration of our products are done by our engineers to insure the best quality and the delivery on-time.

If you want us to assist you to develop your ideas or customizations, please contact us for further inquiries.

“WILITEC, to serve companies in well intervention business with high commitment to excellence and a passion for exceeding expectations.”

Lightweight Wireline Unit

A versatile unit, using hydraulic closed loop system and three wheel measuring head, for your Slickline, Fishing and Production Logging Operation.

Lightweight Power Pack

Unique frame design in two parts for an easy maintenance of the hydraulic closed loop system.

Toolbox Lubricator Skid Unit

Customized transportation frame, tool box & lubricator racks & fishing tool box, to fit exactly your requirements.

Workshop Container

A wide range of fit-out options which includes tool racks, benches, drawers, vises and hoists for your workshop container.

“WILITEC, to serve companies in Well Intervention business with high commitment to excellence and a passion for exceeding expectations.”

The Company Wilitec was established in Singapore in October 2013. Wilitec specializes in Engineering and Manufacturing of Well Intervention Products and Technologies.

Historically, the founders have been exposed more than 20 years to the Well Intervention operations in the field onshore and offshore, the engineering & development and manufacturing of surface and down hole equipments. This diversity is reflected in the company's business orientation; Wilitec has an exceptional level of expertise in the slickline winches and hydraulic power packs, our main focus at this stage.

The Company is staffed with a strong team of engineers and technicians for R&D, engineering and design for new products, and daily Production control. As well all our engineers have more than 10 years in the design of equipment for Well Intervention, which enables us to ensure reliable quality and delivery on-time confidently. We provide multi-disciplined engineering expertise from our team as Structural, Mechanical, Hydraulic, Electrical and Instrumentation. The Company is maintaining a vibrant and ever growing team of corporate and technical engineers and professionals to develop our portfolio everyday.
